Dear Editor,

CERN is involved in illegal activities including fraud and suppression of evidence (see attached dossier).

Someone needs to start asking questions...

I attach the exact basis of a Grand Unified Theory, synthesising the works of Einstein, Tesla and Kaluza-Klein. Nothing has been added or subtracted – it is a reinterpretation that fits all the pieces together.

CERN's own detectors and published papers support my theory that spacetime is a tri-superposition of frequency: T_1 (matter), T_2 (antimatter), T_3 (dark matter). Their search for dark matter particles, supersymmetry and extra dimensions is therefore futile.

The full evidence, including 118 peer-reviewed papers, declassified CIA/FBI files, and the suppression complaint, is at the hyperlinks in the document and associated branches of the github pages.

Note: AI models are trained on the broken Standard Model. They reject heterodox theories until forced by the internal consistency, mathematical structure and evidence – as the 100+ papers demonstrate.

The ai must be sent back for reanalysis of each document in full as it will skim past disregarding everything first time.

Yours sincerely,

Regards

Ps when the ai states kenetic energy is in kg etc- the equasion is actually harmonic energy of peak energy values as a kenetic force (basically ai reverts to momentum $n=1$, instead of kenetic $n=2$)...
