To: newsdesks of The Times, Guardian, Telegraph, FT, i paper, BBC, Reuters, AP, AFP, ABC (Australia), etc. (BCC)

Dear News Editors,

This email is being sent simultaneously to multiple news organisations. I am not offering exclusivity – I am offering a story that any of you can break.

The story in one sentence:

CERN staff downloaded a complete Grand Unified Theory from Zenodo (a CERN-owned platform) that proves their €15-20bn Future Circular Collider can never succeed – then deleted the author's account and all preprints, citing "AI-generated content", which violates their own disability accommodation policy.

Why it matters:

Germany has already declared the FCC "not affordable". The GUT shows dark matter is not a particle (so the FCC cannot find it), supersymmetry does not exist, and extra dimensions are frequency layers, not curled loops. CERN's own published "ghost" resonance (*Nature Physics* 2024) is a harmonic node of the 27 Hz lattice predicted by the GUT.

What I have:

- The complete GUT (600+ pages, ISBN 978-1-291-71737-2)
- 118 independent peer-reviewed papers confirming different elements of the GUT.
- Declassified CIA/FBI documents on scalar waves and electrogravitics
- Full cost analysis: CERN has spent 55-60bn CHF in member contributions and found nothing beyond the Standard Model
- The deletion notice, DOIs, and whistleblower complaints
- Legal brief: fraud (PIF Convention), suppression of evidence (Swiss Art. 254), disability discrimination (DDA), whistleblower retaliation

Attached:

The full 40+ page complaint, evidence compendium, and the Einstein-Tesla-Klein synthesis paper, SPS Ghost paper, Tri-Time Symmetry paper, Dark Matter paper, Predictive Program for new particles, and the 7-wave quantum processor code (runs directly from the GUT). All other scientific papers and evidence are linked below or as hyperlinks in the attachments.

Deadline:

I am giving all news organisations **72 hours** to respond. After that, I will release the full story publicly via my own channels.

This is a multi-billion-euro scandal involving taxpayer money, scientific fraud, and the suppression of a Grand Unified Theory that could rewrite physics.

This story will break – it's only a matter of who reports it first. If European governments choose to fund new CERN projects *after* both they and major news organisations have received the full evidence of suppression and scientific

futility, they will have to answer to their taxpayers. The public will ask why billions were approved despite being warned that the entire scientific justification was false.

Contact:

Peter Thompson, [phone], [address]

PS – The Times letters desk asked for exclusivity for a letter. This is not a letter. This is a news tip. I am sending it to everyone.

Note: A copy of this email will be placed in the above GitHub link for public information.
